

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged vertically, with the longest bar at the top and the shortest bar at the bottom. The lengths vary significantly, with some bars being nearly full-width and others being very short. The bars are arranged in a single column, with the longest bar at the top and the shortest bar at the bottom. The lengths vary significantly, with some bars being nearly full-width and others being very short.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with their right edges aligned to a common vertical line. The lengths of the bars vary significantly, representing a distribution of data. The longest bar is the 10th bar from the top, and the shortest is the 15th bar from the top.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with each bar representing a data point. The lengths of the bars vary significantly, with some being very long and others very short, creating a jagged profile. The bars are set against a light gray background with a white grid.

A horizontal bar chart consisting of 30 bars. The bars are arranged vertically, one above the other. Each bar is a solid dark gray color. The lengths of the bars vary significantly, with some being nearly full-width and others being much shorter. The bars are distributed across the entire width of the chart area, with no bars being zero-length or exceeding the maximum width.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with each bar representing a data point. The lengths of the bars vary significantly, with some being very long and others very short, creating a jagged profile. The bars are set against a light gray background with a white grid. The chart does not contain any text or labels.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with each bar representing a data point. The lengths of the bars vary significantly, with some being very long (nearly spanning the width of the chart) and others being very short (less than a quarter of the width). The bars are set against a light gray background with a white grid. The overall pattern of the bars is irregular and jagged, suggesting a non-uniform distribution of data.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with each bar representing a data point. The lengths of the bars vary significantly, with some being very long and others very short, creating a jagged profile. The bars are set against a light gray background with a white grid. The chart does not have any labels or titles.

A horizontal bar chart consisting of 30 black bars of varying lengths. The bars are arranged in a single column, with their lengths representing a distribution of data. The longest bars are approximately 100% of the chart's width, while the shortest are around 10%. The bars are arranged in a roughly descending order of length, with some fluctuations. The chart is set against a plain white background.
